

HAND & SURFACE HYGIENE: WHAT YOU NEED TO KNOW

The single most important route for the spread of infection is the hands.¹ The World Health Organization (WHO) advises that, to protect yourself and others against COVID-19, you should clean your hands frequently and thoroughly using an alcohol-based hand sanitiser or by washing your hands with soap and water.²

Since so many illnesses are transmitted by touch, it's also important to clean high-traffic objects and surfaces frequently, particularly items such as worksurfaces, door handles, and light switches.

WHY GOJO?

EXPERTS IN THE FIELD OF HYGIENE

Founded in 1946, GOJO is an internationally recognised expert in the skin & surface hygiene industry, with a broad portfolio of specialised and complete solutions, solving hygiene needs in any professional environment. We are continually investing in research and development to create sustainable hygiene solutions through technological and scientific innovation.

TRUST IN US FOR THE LONG-TERM

Saving lives and making life better through well-being solutions is our mission and will continue to be the focus of our business during and after the current pandemic. With a proven leadership history, we drive innovation and growth in the hygiene category and provide products for some of the most demanding and specialist markets, including healthcare and the food service industry. We value long-lasting customer partnerships based on mutual trust and sustained growth.

SPECIALIST SOLUTIONS

We offer a broad portfolio of high efficacy cleaning and sanitising solutions developed using specialist market insight to solve hygiene needs in any professional environment. Every product in our range undergoes rigorous testing to ensure it complies with European regulations.

MORE THAN JUST PRODUCTS

In addition to high quality skin and surface hygiene solutions, we provide the tools to help businesses identify the appropriate products for their environment, and educate consumers on the need for and proper usage of these hygiene solutions. To support businesses who may be updating their hand and surface hygiene programmes, we have developed checklists and product placement guides, highlighting which hygiene products you are likely to need and where to place them for a variety of different industries.
